APPENDIX E

SOURCE REFERENCES

The sources used in this research aid are publications and announcements of the government and Communist Party of the USSR, Soviet newspapers and periodicals, reports on Soviet radiobroadcasts, reports of prisoners-of-war and other returnees and defectors from the USSR, reports by attachés and travelers, photographs, and, occasionally, other sources. The overwhelming majority of sources used in preparing this research aid do not appear in the individual list of source references that follows, because the sheer volume of these sources would make it impractical to list them. The brief summaries of individual plants for example are based on a study of hundreds of reports contained in the files of this organization and on other sources. All the material available in the Industrial Register on each of the rolling stock plants mentioned in this research aid was studied.

Evaluations, following the classification entry and designated "Eval.," have the following significance:

<u>Source of Information</u>	<u>Information</u>
Doc. - Documentary	1 - Confirmed by other sources
A - Completely reliable	2 - Probably true
B - Usually reliable	3 - Possibly true
C - Fairly reliable	4 - Doubtful
D - Not usually reliable	5 - Probably false
E - Not reliable	6 - Cannot be judged
F - Cannot be judged	

"Documentary" refers to original documents of foreign governments and organizations; copies or translations of such documents by a staff officer; or information extracted from such documents by a staff officer, all of which may carry the field evaluation "Documentary."

Evaluations not otherwise designated are those appearing on the cited document; those designated "RR" are by the author of this research aid. No "RR" evaluation is given when the author agrees with the evaluation on the cited document.
